

Dealer warranty volume & approval standards

Document: WC-WTY-DLR-001 | **Revision:** 2.0 | **Effective:** April 2026 | **Audience:** Internal warranty & dealer programs | **Classification:** Internal use only

Rolling periods are measured backward from today. Counts and rates apply per **authorized dealer** (account). Adjust thresholds with Warranty Program Office approval; supersede with the system of record if figures differ.

1. Claim volume per dealer (rolling windows)

Maximum **submitted** warranty claims allowed per dealer in each rolling period. Exceeding a limit triggers review (not an automatic stop); program office may grant exceptions.

Rolling period	Maximum submitted claims per dealer
30 days	15
60 days	28
90 days	40

2. Acceptable claim approval rate (per dealer)

Definition: Of all claims the dealer submitted in the period that reached a final decision, the share that were **approved** (excluding withdrawn or cancelled before decision).

Metric	Acceptable range	Follow-up
Approval rate (rolling 90 days)	75% to 92%	Below the range: review quality of submissions. Above the range: confirm controls are not overly permissive.

Program office may set tighter targets for specific regions or product lines.

Controlled document. Warranty Program Office.
